## The Facts on DNA Testing

### Why do our customers want DNA testing?

It is the highest form of technology available for identification, widely used and accepted by the judicial system. DNA testing allows for conclusive results in a painless, affordable, and confidential manner.

### What is the DNA testing process?

DNA samples are collected in our office by trained and efficient staff. The sample is a non-invasive cheek (buccal) swab. However, for some tests, a sample can be brought in by the client. Samples are then sent to an accredited laboratory, *IDENTIGENE*, for testing. Results are reported back in a timely matter, often only 5 days, with rush options available. Throughout the entire process, our staff is available to answer any questions you may have.

### Why should you go to Interactive Medical Connections for your DNA test?

Our ultimate mission is to provide you with *Peace of Mind*. We want to present the convenience of having DNA testing in the Bay Area, with the privacy of having sample collections done in our office, often with no wait. However, if someone in your party needs to be tested out of the local area, we can arrange a collection site for you or family members across the country. Our team is composed of professionals dedicated to serving YOU in a manner that exceeds expectations.

### What DNA tests do we offer?

The DNA Testing services Interactive Medical Connections provides for its clients include:

- Trio Paternity
- Motherless Paternity
- Paternity- Deceased Alleged Father
- DNA Safeguarding™/ Profiling
- DNA Family Find™
- Grandpaternity/ Siblingship
- Y-chromosome
- Semen Detection/ Infidelity
- Forensic DNA

### Who does the actual testing?

Our DNA services are available through our relationship with *IDENTIGENE*. They are a nationally recognized family relationship and forensic laboratory, accredited by:

- American Association of Blood Banks
  - National Forensic Science Technology Center
  - N. Y. State Department of Health
  - Texas Department of Public Safety
- IDENTIGENE* is on the forefront of DNA testing. Their methods have proven to be reliable and accurate, making them the state-of-the-art DNA testing choice.
